Confirmation #4080
Correspondence 03/02/2002
Correspondence 05/24/2002

Dear Initial Patent Examiner:

We were pleased to submit our system mapping documents which incorporate initial, and amended concepts of operations of our initial patent application. Software configurations demonstrating actual system operation of previously presented claims and capabilities are in development and will be presented as quickly as possible as an inclusion to our patent application. Screens #1, #2, and #3 are in process of final revision simplifying the system, and will be forwarded with our software program demonstrating system operation. Any new charges, necessary departmental forms, or information to incorporate these tentative mapping documents into our initial application file would be greatly appreciated. Our final revision should be complete within four weeks.

Thank you for your help.

Sincerely yours,

Russell B. Huffman
Value Engineering Co.
